REMARKS

SOURCE

1. A radar installation of two mobile radar sets, one closed truck with trailer and one tent, was located one thousand feet north of the PINOWFURTH-PINOW (N 53/V 08) RR branch line, 6,600 feet west of the PINOW RR branch station (see Annex). The grid-shaped structures are of dull dark metal. The truck with a trailer, but not the radar, was camouflaged against observation from the PINOW-PINOWFURTH road. The entire radar installation is situated on a small hill, the close surroundings being free of higher obstacles.

25X1A

Comment: The above radar installation was previously reported by other sources. So far no details on the purpose and performance of the set have been learned. From its location it is inferred that it is probably not used for bad weather landings by bomber units stationed in PINOW.
